ROCHANA GODIGAMUWA

COMPUTER SCIENCE GRADUATE

Colombo, Sri Lanka | rochanagodigamuwa@gmail.com | Github.com | Linkedlin.com | +94 76 404 7757

I am a Computer Science graduate with hands-on experience building full-stack web and mobile applications, and machine learning-based systems, through academic and personal projects. Strong foundation in object-oriented programming, RESTful API development, and applying AI/ML to real-world problems. Eager to contribute as a Software Engineer in a collaborative, technology-driven team.

AREAS OF EXPERTISE

Object-Oriented Programming	Database Design	Deep Learning & Computer Vision
Full-Stack Development	Mobile Application Development	REST API Development
Backend Development	Machine Learning	UI/UX Development
IT Infrastructure	Software Testing & Debugging	

PROFESSIONAL EXPERIENCE

VS ONE (Pvt) Ltd **May 2024 – June 2025**

Trainee Pre-Sales Engineer

- Administered IT infrastructure and security tooling, managing tools like Mobile Device Management (MDM) and Endpoint Security for enterprise deployments.
- Maintained VSONE website portals and pre-sales activities including product demonstrations and requirement gathering analysis for enterprise clients.
- Configured and benchmarked enterprise systems such as network switches and Network Attached Storage (NAS) systems to verify compatibility and optimal performance.
- Designed high-performance workstation solutions tailored to professional workloads, applying systematic evaluation and validation processes.
- Prepared tender documents for enterprise-grade hardware and software solutions, meeting client and compliance requirements.

EDUCATION

University of Westminster (IIT) **September 2022 – June 2026**

First Class - Bachelor of Science (Honours) in Computer Science

Thesis: Deep Learning-based Coconut Leaf Deficiency Detection System (Ensemble Approach with Custom made Model)

Key Modules: Object Oriented Programming, Server-side Web Development, Applied AI, Mobile Application Development, Client-Server Architecture, Usability Testing and Evaluation, Cyber Security, Operational Research Methods

Memberships: IEEE Club, IEEE Computer Society

St. Mary's College, Kegalle **2018 – 2020**

G.C.E. Advanced Levels – Mathematics Stream

Memberships: Member Of School Astronomical Society, Member of School Parliament, School English Announcer.

Royal International School, Kegalle **2004 – 2017**

G.C.E. Ordinary Levels

Achievements: Head Prefect (2017), School Sports Captain (2017), Member of School Debating Team, School English Announcer, Member of School Cricket Team (U-17), Member of School Volleyball Team (U-17)

KEY PROJECTS

CocoDef: Coconut Leaf Deficiency Detection System (Python, TensorFlow, React, Flask)

Final year project developed a full-stack web application for coconut leaf deficiency detection using MobileNetV2, a Custom CNN, transfer learning, image preprocessing, data augmentation, and Grad-CAM Explainable AI. The system supports real-time image upload, automated deficiency classification, fertilizer recommendations, multilingual access, and visual heatmap explanations to improve usability and interpretation for non-technical users.

PawLink: Community Platform for Adopting Stray Animals (React Native, Firebase, Tailwind)

React Native mobile platform connecting pet enthusiasts with stray animals, it features pet profiles, adoption listings, vet scheduling, and community tools. Built with Firebase as backend and using Tailwind CSS.

Health System REST API (Java, Jakarta EE, JAX-RS, Jersey, Maven)

Built a RESTful healthcare management backend with CRUD APIs for patients, doctors, appointments, and medical records using JAX-RS, Jersey, JSON, and layered architecture.

E-Shopping Manager (Java, Java Swing)

Online shopping system in core Java, applying OOP principles to model products, managers and users with a Java Swing GUI for managing, listings and purchases.

Football Club Browser (Kotlin, Jetpack Compose, Room)

Developed a native Android app in Kotlin retrieving live football club and league data from TheSportsDB REST API, with local Room (SQLite) caching, case-insensitive search and a Jetpack Compose.

Guess the Country: World Flags Mobile Game (Kotlin, Android Studio)

Developed a Kotlin Android app with four game modes using flag images from 256 countries, featuring real-time colour-coded answer feedback and score tracking.

TECHNICAL AND PROGRAMMING PROFICIENCIES

Programming Languages | **Frameworks & Tools**

Java, Python, JavaScript, Kotlin, TypeScript | *React, React Native, Flask, Next.js*

Machine Learning

TensorFlow, Deep Learning, Computer Vision, Data Preprocessing, Model Training, Grad-CAM / Explainable AI

Databases & Backend | **Cybersecurity**

SQL, Firebase, MongoDB, SQLite | *Kali Linux, OWASP fundamentals, Network security concept*

IT Infrastructure

MDM, Endpoint Security, NAS, Network Configuration
